See **

Key:
Red text: new schedule/vaccine

Additional information:

*There are no safety concerns with giving 3 MMR or MMRV containing vaccines.

There should be a one-month gap between 2 MMR-containing vaccines. See “Frequently asked questions” at [Changes to the childhood immunisation schedule - Information for health professionals - Public Health Wales](#) for more information

For more information about the changes to the childhood immunisation schedule, see: [Changes to the childhood immunisation schedule - Information for health professionals - Public Health Wales](#)

**Any children with uncertain or incomplete immunisation status should be managed according to the [Vaccination of individuals with uncertain or incomplete immunisation - GOV.UK](#) (external site)

The [childhood immunisation eligibility calculator \(external site\)](#) is available to help you to understand and plan which vaccines are due and when. Please ensure that you are familiar with Welsh policy when using this external site: [Routine varicella \(chickenpox\) vaccination for young children from 1 January 2026 \(WHC/2025/046\) \[HTML\] | GOV.WALES](#)
